

Center for Pharmacotherapy Research and Quality

Mission: *to advance evidence-based use of pharmacotherapy and to support medication-related outcomes research and quality improvement initiatives*

Increasing Value of Medication Use

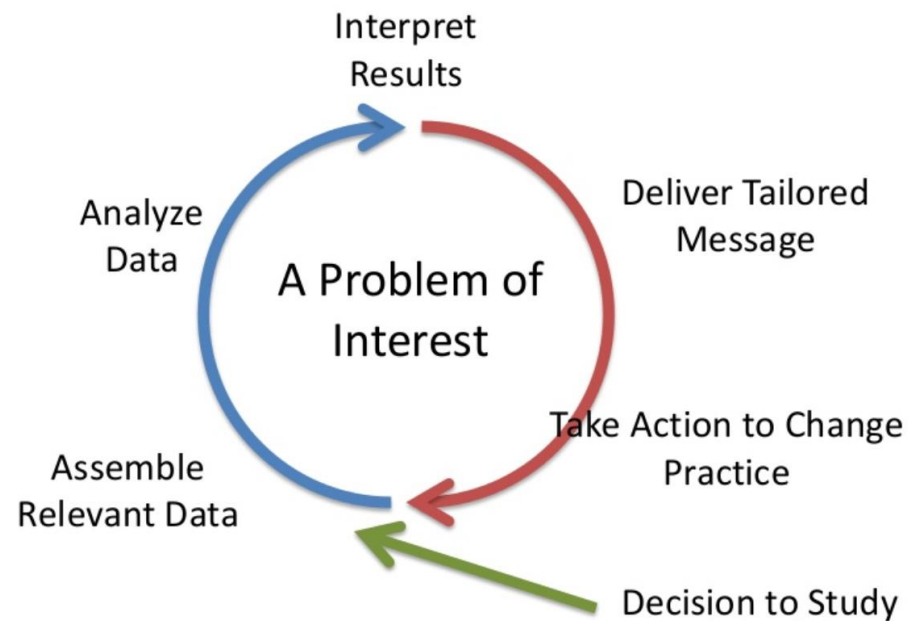

$$\text{Value} = \frac{\text{Outcome}}{\text{Cost}}$$

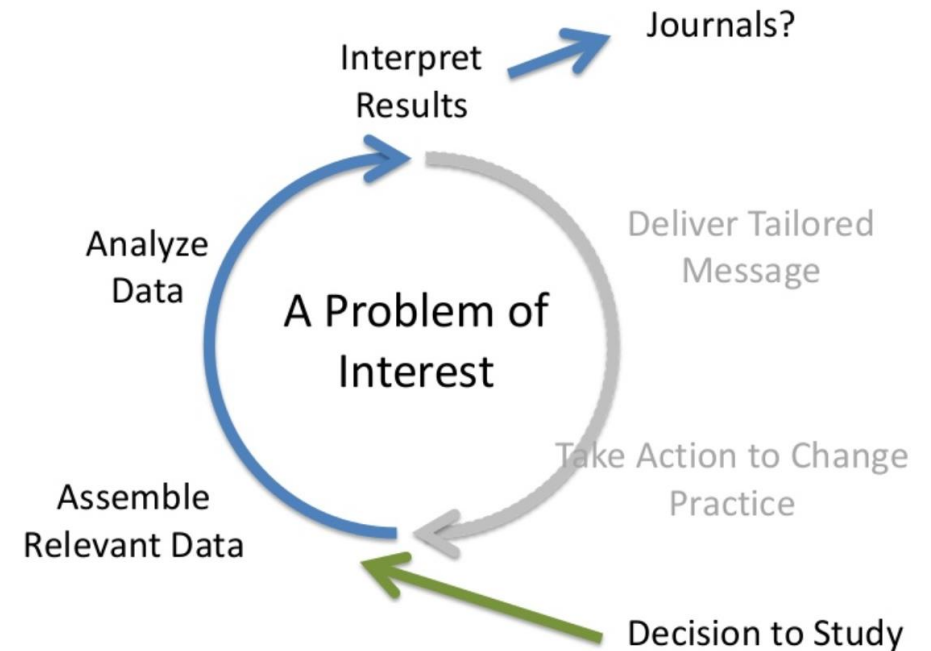

Quality → Outcome
Efficacy → Outcome
Safety → Outcome
Resource tallies → Cost
Dollars → Cost

Learning Health System Approach

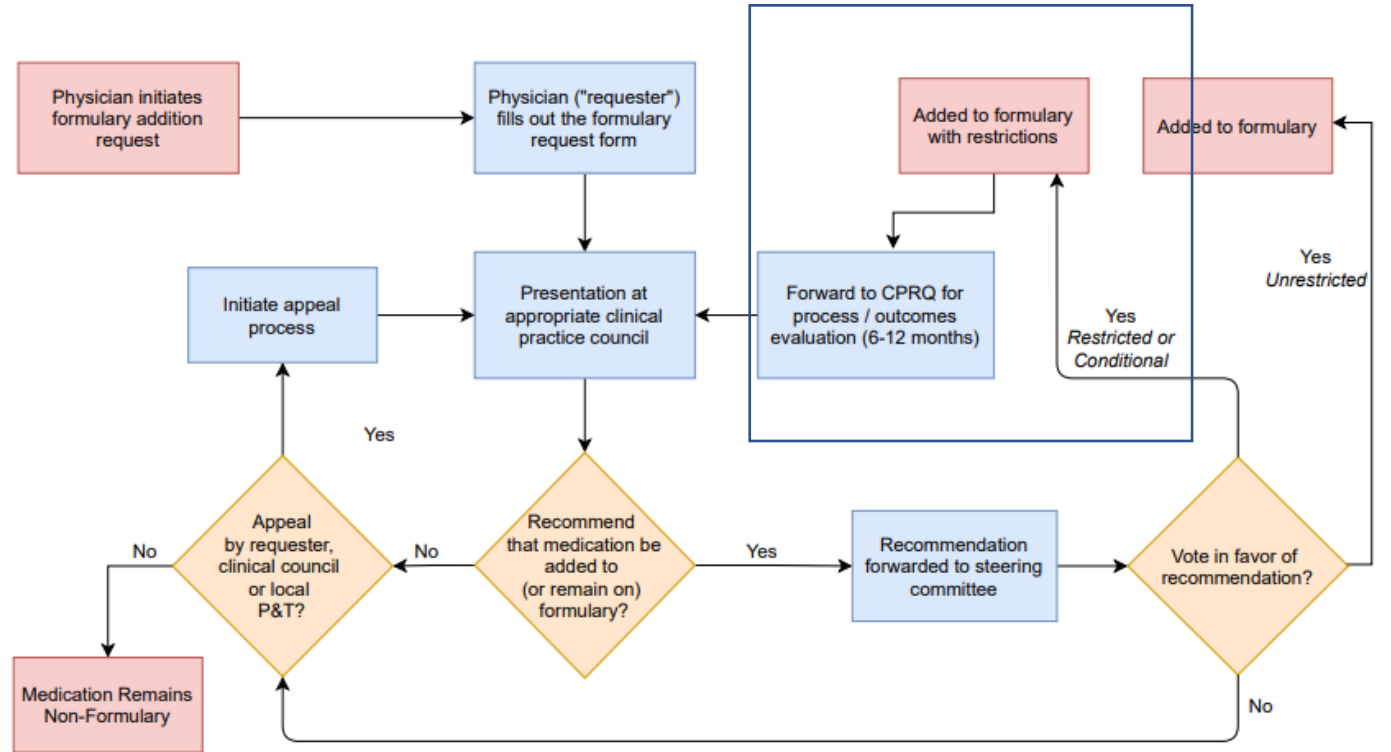

Better Health Requires This

Not This

System P&T Process

CPRQ Referral Criteria

Uncertainty regarding effectiveness in routine clinical practice conditions

Specific safety concerns

Concern that a formulary medication will be utilized outside of approved criteria (i.e. potential to be mis-used)

Carries a significant financial risk to the health system
